

SQL Interview

Questions Part - 1

Q: Explain the difference Between a Primary Key and a Foreign key in a relational database.

A: The **primary key** is used to identify a unique row within a table. And

the **foreign key** is used to establish a relationship between two tables by referencing the primary key of another table.

SQL Interview Questions

Q: what is a join in SQL, and what are the different types of Joins?

A: A Join is a way to combine data from multiple tables based on a related column,
